Enterprise-like features payroll system with a super friendly price tag!

The team behind transact²-HR understands the challenges faced by companies when it comes to HR operations, especially payroll. Thus, the solution aims to assist day-to-day operational needs with ease.

Policies and service records are tracked with effective dates, which means, new policy can be entered in advance and staff service movement can be entered in advance too! All will only be effected in payroll process upon effective date.
Complete flexibility is extended to allow companies to define various movement types for analysis purpose.

No more restriction in wage types, hourly, daily, monthly, weekly, biweekly, bi-monthly etc, transact²-HR has it all. Same goes to payroll run, it can be done monthly, weekly, bi-monthly etc.

Multi companies with single payroll run for highest efficiency! With transact²-HR, company may decide to run payroll for all companies at one go with accurate payroll management report and statutory report. All cost will be reflected accordingly at respective company, department, branch etc

Having more than one active employment running concurrently is addressed as well. For example, managing director in company A may also be the financial controller in company B, with transact²-HR, the staff can be receiving 2 payslips, 2 EA forms and movement in both company A and company B can be tracked.

Featuring Personnel & Payroll for a start, transact² is always on the move, new modules and new features are in progress and will be added to the offerings soon!
